Shannon Rusk - Owner
East Texas Longhorn Trailers, LLC.*

*"Trailstar has been a reliable supplier for our entire tire
and wheel needs for over 15 years. We depend on
Trailstar to help us keep our products competitive by providing
us with quality products at a competitive price.
But Trailstar's finest quality is their outstanding service."
Darrell Rogers, President - Falcon TrailerWorks, Inc.*

North American Trailer Dealers Association

TODAY AND TOMORROW

TRAILSTAR was founded in November 1995 by Les Arnold with the sole intention of being the very best supplier the utility trailer industry ever had and that mentality remains even stronger today. With a proven 99.9 percent fill-rate and time tested quality tire & wheel assemblies as our specialty, growth has been nothing short of phenomenal.

TRAILSTAR has grown from one shop located on one half acre in Commerce, Texas, to seven shops and one fully automated inflation machine spread over two locations and sixteen acres, all owned by Les Arnold, with no long or short term debt.

Management is the key to any operation and again we lead the industry starting with the Owner/CEO, Les Arnold. Les founded **TRAILSTAR** after a highly successful career in Manufactured Housing with over twenty years' experience in various positions from General Manager to Vice-President and Director of Purchasing of multiple plan operations from coast to coast. Having been a Purchasing Manager all his adult life, it provided the impetus to found **TRAILSTAR** and service the utility trailer industry from a Purchasing Manager's perspective; no back-orders, extremely competitive pricing, on time delivery, quality products and unparalleled warranty and service when required.

Serving as President and C.O.O, Kurt Arnold also has extensive Manufactured Housing experience in various capacities, starting to work for his father as a fork lift driver/head receiver and advancing through the ranks into purchasing and management at various facilities his father managed. Kurt not only oversees the day to day plant activities but makes the final decision on all warranties, something you won't find anywhere else.

Serving as Vice-President for Sales & Marketing, Richard Kearney brings a wealth of industry experience, especially on the wheel side, where he was General Manager of a large U.S. Wheel manufacturer in California prior to joining **TRAILSTAR** and held several key management roles with Greenball and other companies within the industry.

TRAILSTAR continues to be copied but has never been duplicated. Having started the mounted assembly program brought over from manufactured housing, it is the industry standard today. **TRAILSTAR** also was the first to import Chinese tires, something unheard of until **TRAILSTAR** was founded and of course continues today, stronger than ever. Although not as well-known as others servicing the mounted assembly segment of the Utility Trailer industry, **TRAILSTAR** is a multi-million dollar company with record annual growth and is set financially to lead the industry for years to come.

Tire/Wheel Warranty Information

We are pleased to supply the tire and wheel assemblies on your trailer. Should you experience problems with any tire or wheel or assemblies please fill out and email or fax direct to **TRAILSTAR** for immediate action.

Please take time to review the below listed warranty limitations and guidelines.

What Is Warranted and For How Long

Your tires are warranted against failure due to defective materials and workmanship.

Tires are eligible for warranty if presented not more than 1 year from date of manufacture (D.O.M.) of your trailer and has a minimum of 2/32" tread remaining.

Computing Treadwear

Treadwear is computed as a percentage of the original, usable tread. The original, usable tread does not include the last 2/32" of tread depth.

What is Not Covered by the Warranty

Failures due to fire, accident, malicious mischief, improper inflation, improper use, running flat, overloading, or road hazards. Example of road hazard includes nails, glass, and other foreign objects and natural and man-made defects or obstacles, such as excavations, construction, potholes, and chuckholes. Damages caused by road hazards include cuts, snags, punctures, scuffs, carcass bruises and impact breaks.

- Premature or irregular wear due to improper inflation or alignment or balance.
- Tires presented by other than the original consumer.
- Tires with weather cracking which were purchased more than 1-year prior to presentation are not covered.
- Loss of time, inconvenience, loss of use of the vehicle, costs of towing or transportation or consequential damages of any type or nature.
- Any implied warranty, including merchantability or fitness is limited to the duration of this written warranty or 1 year, whichever is less.
- Balancing or mounting charges.

****Note:** The limited warranty is the entire warranty by **TRAILSTAR** and **TRAILSTAR's** complete obligation is as set forth herein. No one has the authority to imply, suggest, agree, represent, warrant or promise contrary to the terms hereof.

TERMS & CONDITIONS

1. **Payment:** Net 30 days from invoice date on approved credit.
2. **Freight Charges:** Additional freight charges may apply based on order quantity.
3. **Shipments:** To one location per order. Any additional drop-off charge for multiple location shipments will be prepaid, with drop-off charges added to the invoice.
4. **Returns:**
 - a. ALL returns require authorization by a TRAILSTAR representative before drop off.
 - b. Returns must be received within ten (10) days of receipt of shipment. Customer must ensure that returned products are packaged and returned in their original condition.
 - c. Non-defective material will incur a 20% restocking fee.
 - d. Special orders and discontinued items cannot be returned.
 - e. No credit can be issued until an inspection is made and the defect is verified. Credit will be issued at original invoice price only.
5. **Claims:** Shortage claims, error or defect in shipment must be made within 72 hours of receipt of goods.
Claims for damage or loss in transit must be made directly with the carrier.
6. **Prices:** Price and terms are subject to change without notice.

WARNING

Tire Mounting can be dangerous if not done by trained personnel using proper tools and equipment. For your own safety, seller recommends that users have tires and inner tubes changed by experienced service personnel.

Weight or Quantity Minimum for delivered pricing terms is subject to change due to outside (external) influences. You will be requested to approve any additional expenses or price changes prior to the shipment of your order.

TRAILSTAR strives to ensure the accuracy of all information contained in this catalog. However, misprints, inaccuracies, omissions and other may occur.

TRAILSTAR does not take responsibility for any errors, misprints, omissions or any other inaccuracies found herein; including but not limited to product information, specifications or item availability.

All of the items we sell are subject to continuous development and design, TRAILSTAR reserves the right to change construction, materials, or specifications without notice or obligation.

TRAILSTAR

ST Trailer Tires

The Key to Getting the
Most Out of your ST-TIRES
is to Perform Regular Tire
Maintenance

TRAILSTAR began distributing trailer tire and wheel assemblies to trailer manufacturers over 20 years ago. Today, TRAILSTAR produces four brands of quality ST-tires: Our radial ST-tires, the TRAILFINDER HT and NEW THIS YEAR the TRAILQUEST along with our bias ST-tires, the All*Star and Tex*Star.

Tread Depth

- ▶ Your tires should have a minimum tread depth of **1/16 inch**. Measure this with a proper tire tread depth gauge.

Monitor your tire pressure frequently using a using a pressure guage.

Do this at least monthly.

- ▶ Take a pressure **reading when your tires are cold** (not driven on) and when the trailer is empty and sitting on a flat surface. The maximum PSI (pounds per square inch) is found on the sidewall of the tire along with the maximum load rating.
- ▶ ST-tires should be inflated to their **Maximum Air Pressure**.
- ▶ **Do not overinflate your tires.** As you drive, the heat generated will naturally cause the tires to expand. If you've overinflated the tire you risk a blowout.
- ▶ In addition to regular tire maintenance, **take a walk around your trailer before you drive away from a stop.** Make sure the load is still secure and wheels are tight and roll freely.

- ▶ **"NEVER LOAD THE TRAILER BEYOND THE MANUFACTURER'S DESIGN LIMIT (GVW)."**
- ▶ **Load your trailer heavier in front** (unless otherwise directed by the trailer manufacturer)
- ▶ The trailer should have about **60%** of the cargo weight in front and **40%** in the back.

This information is available online at **WWW.TRAILSTARTIREWHEEL.COM**. You will also find a complete listing of our product line and catalog online and a PDF format for download.

We are the BEST! Service 1st!
